### Food and life sciences makerspace

A workshop with different areas: metal and wood work machines electronics 3D printer CNC machine laser cutting textile manufacturing

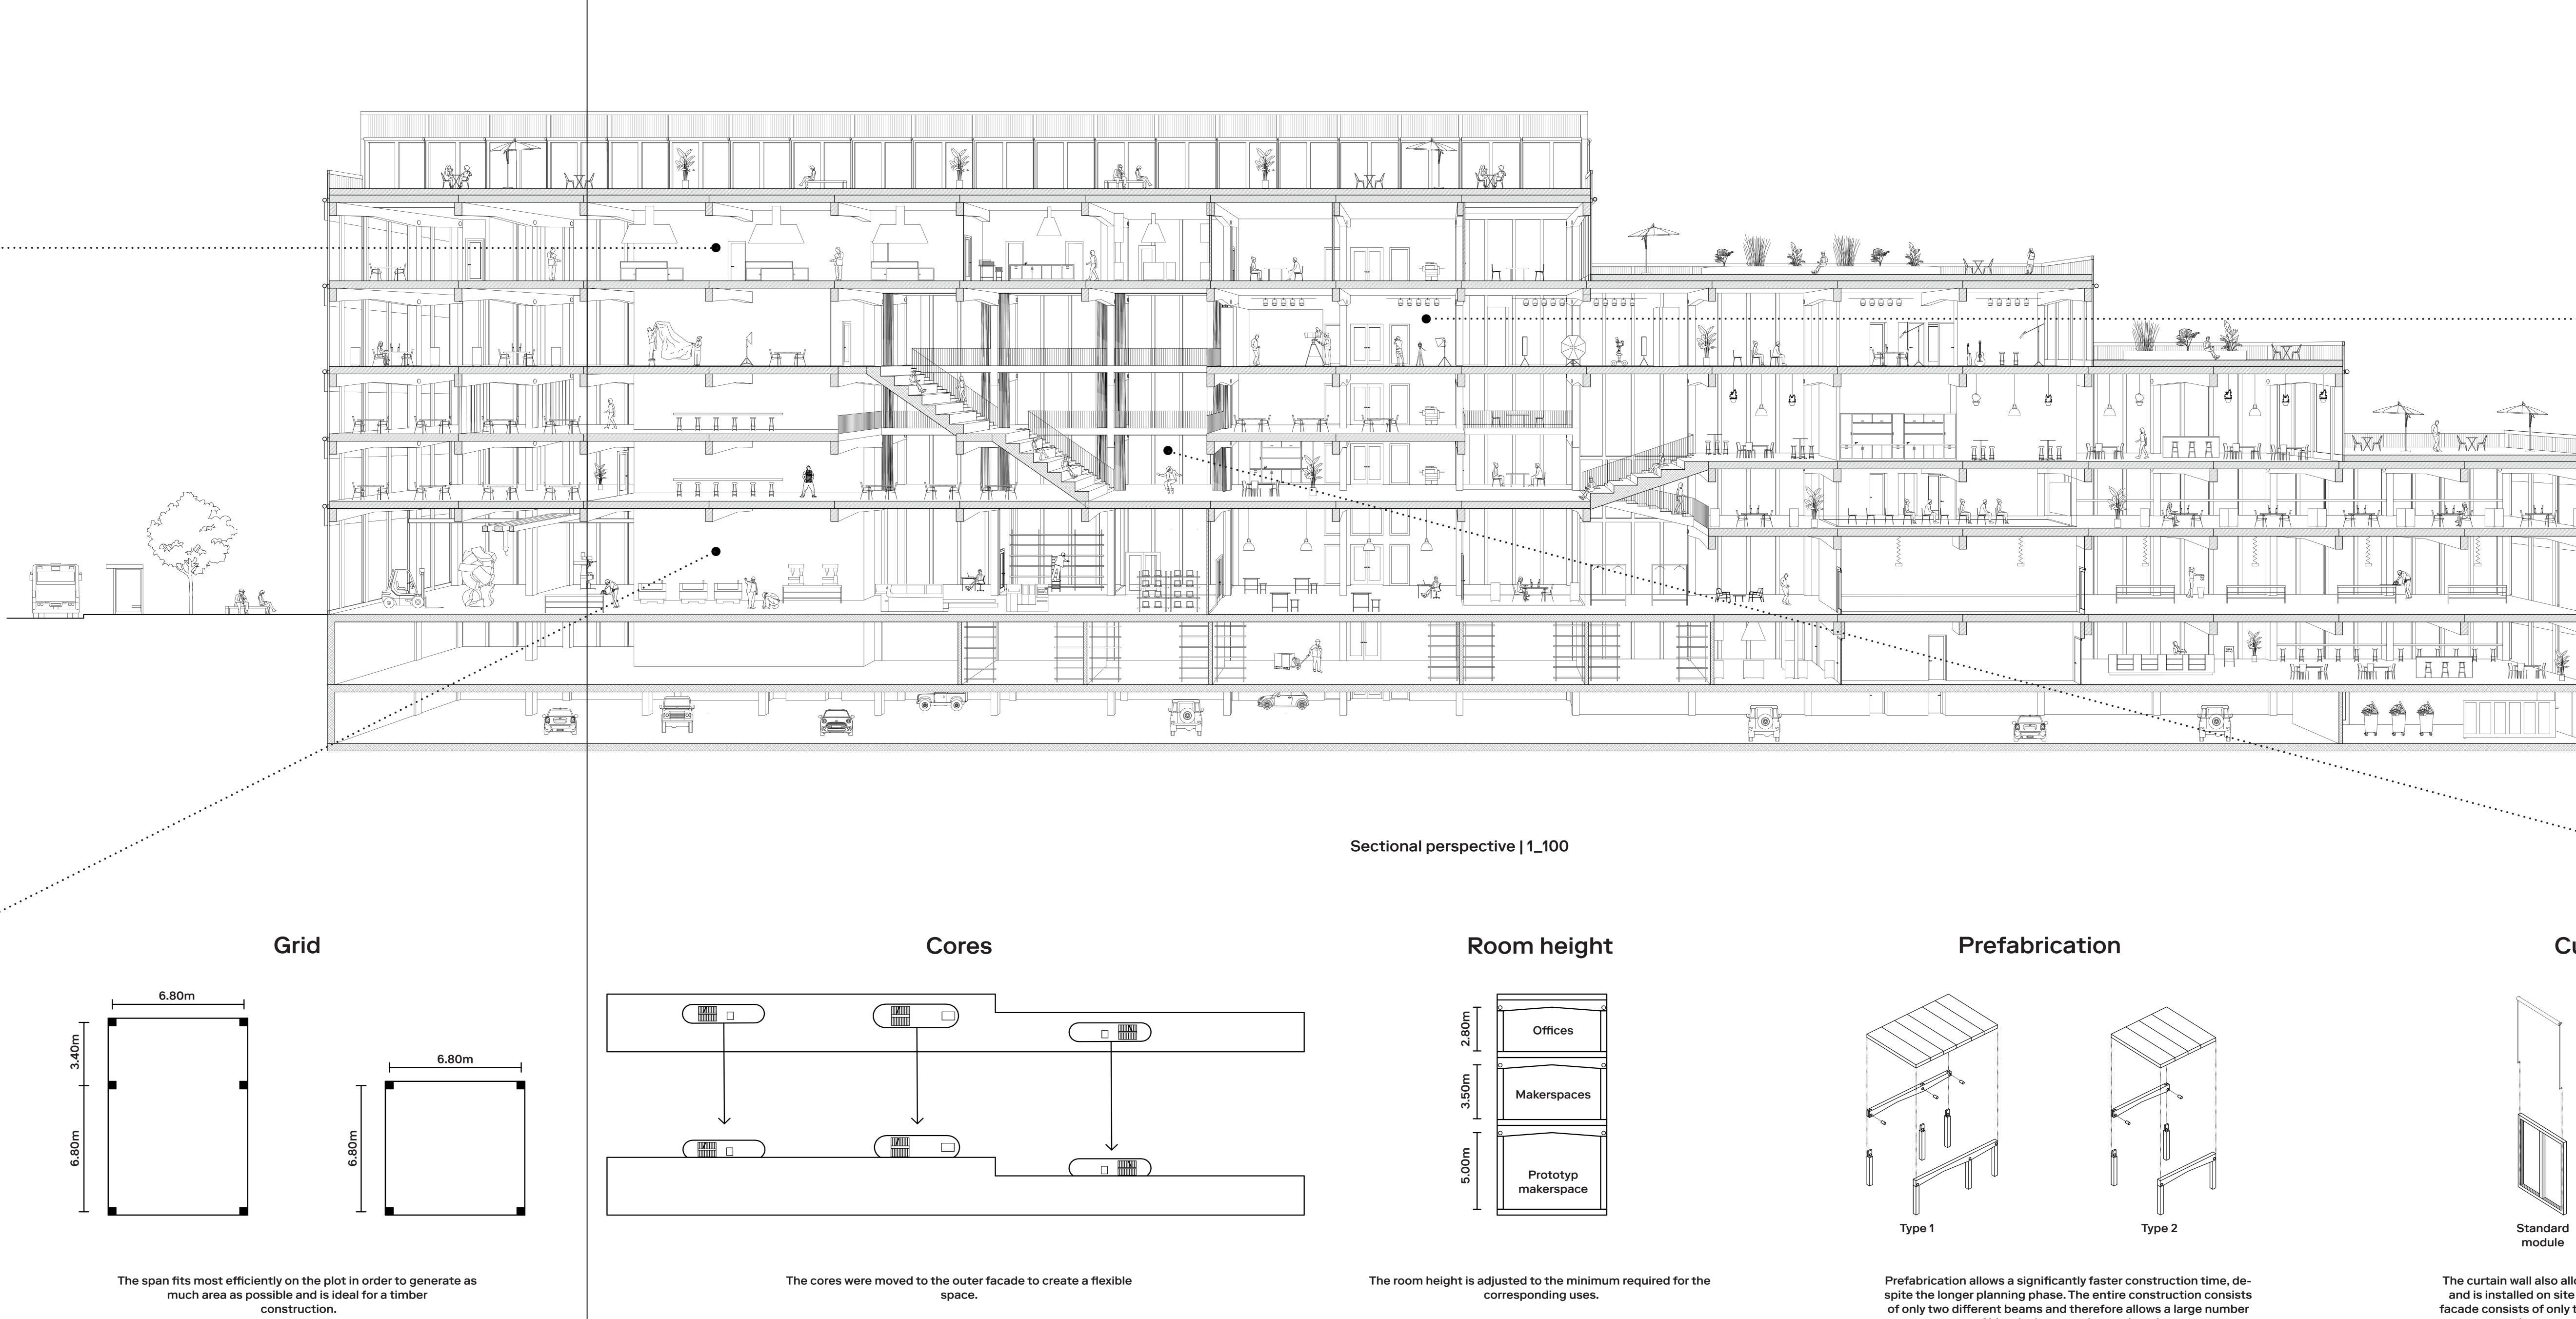

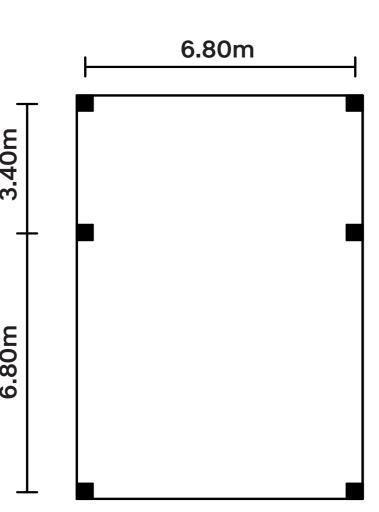

### Prototyp makerspace

A laboratory room: test kitchen for new foods pharmaceutical products laboratory area evaluation room locker rooms dry and cold storage

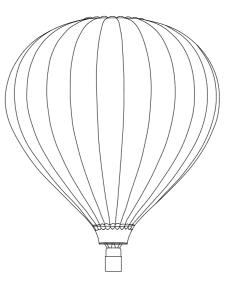

construction.

# Use & economy of the building

of identical parts to be produced.

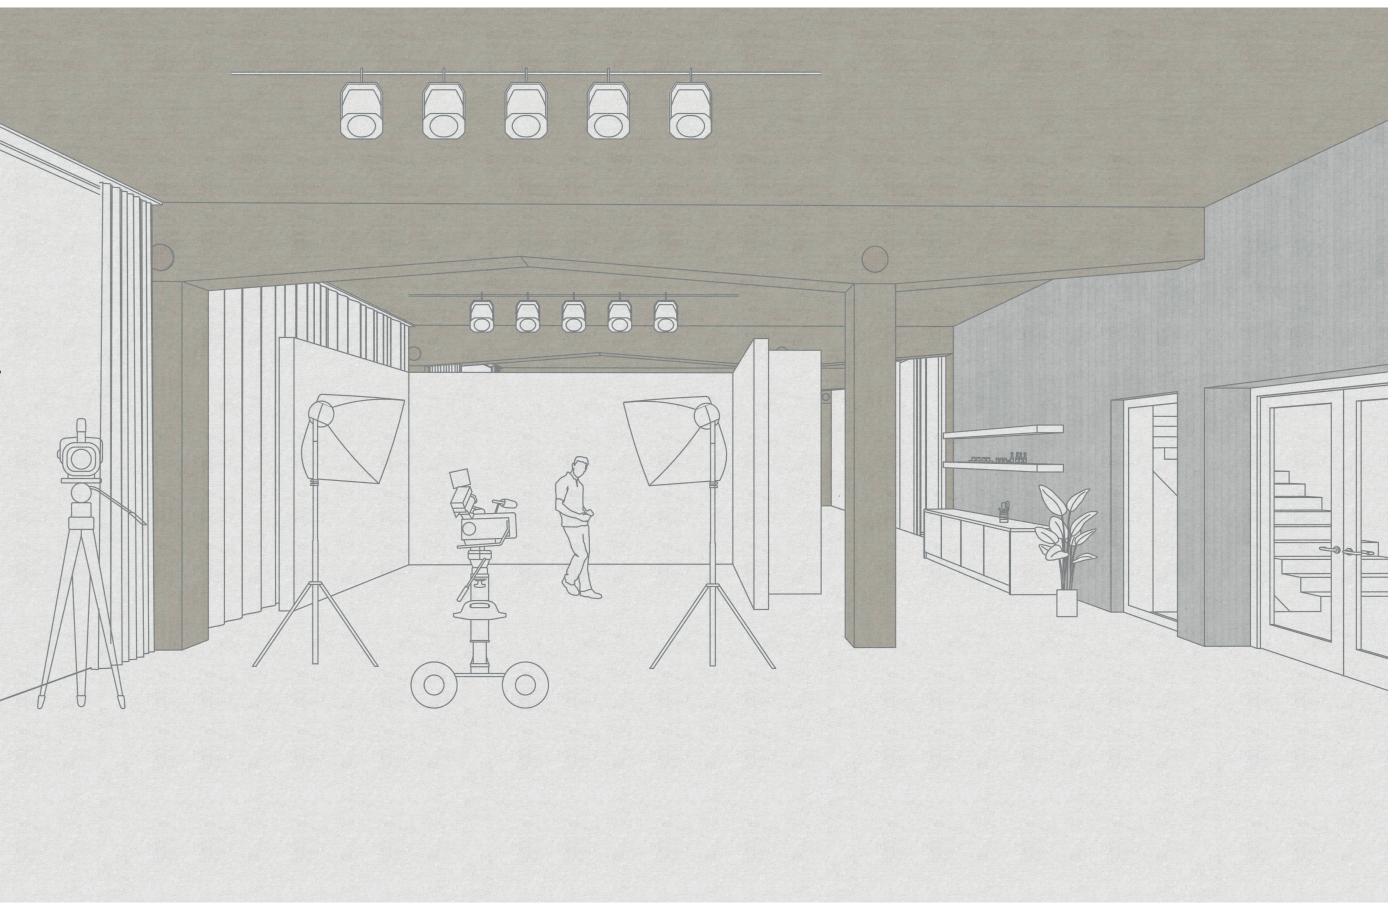

The curtain wall also allows a much faster construction method and is installed on site as a prefabricated element. The entire facade consists of only two different elements and therefore allows a large number of identical parts to be used.

## **Digital and photo** makerspace

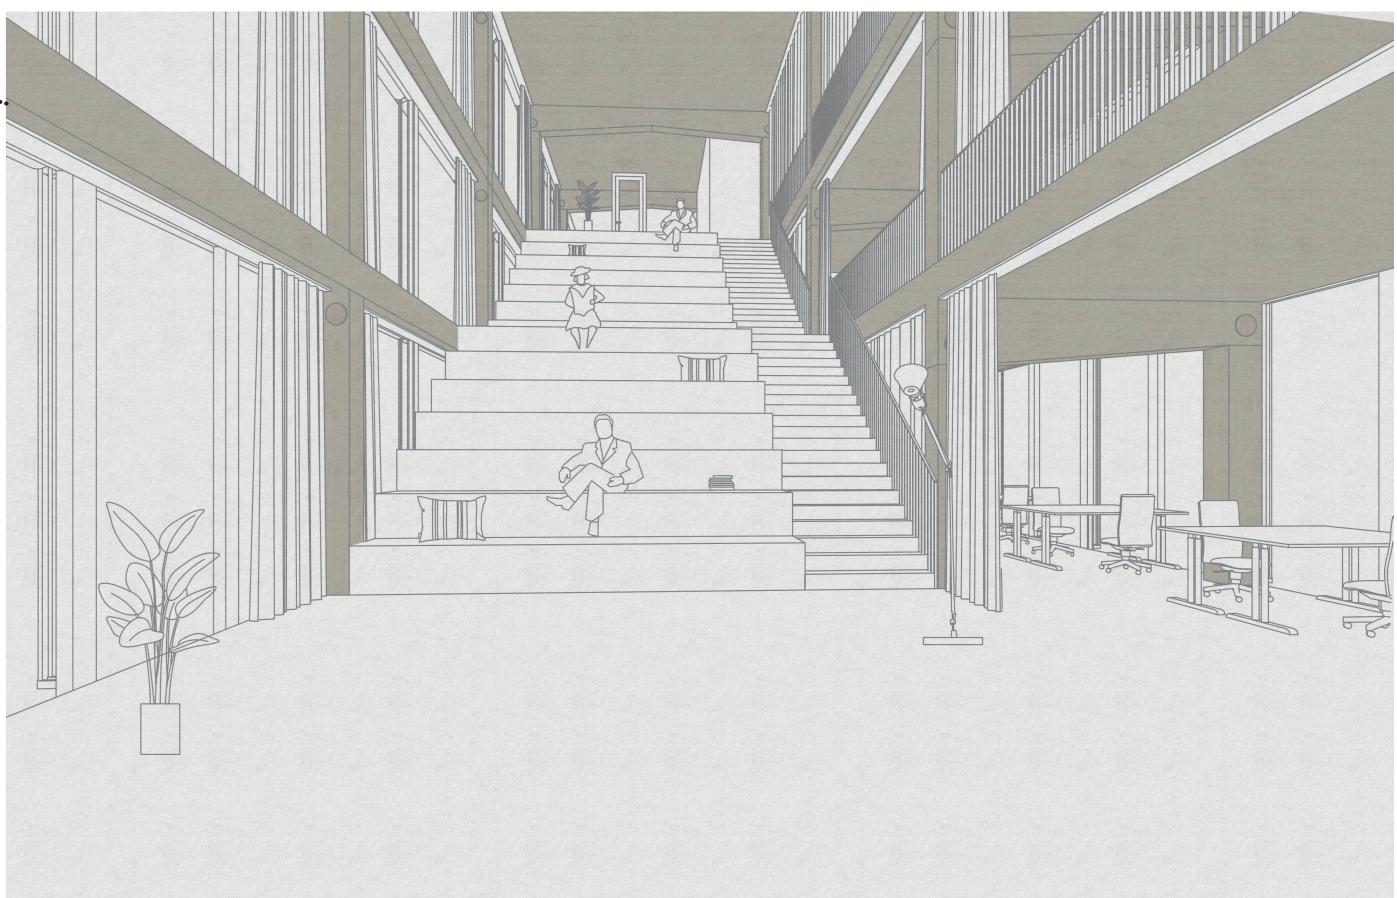

A space for media skills: virtual reality studio video studio with green scree radio studio music studio photo lab image and video editing

## **Multiplex**

A multifunctional space: central meeting point events lectures cinema shows exchange
