Cyclical bat seasons

Bat faces

- > Bats alone account for 20% of the world's mammals.
- > Healthy ecosystems when bats are present.
- > In Switzerland there are 30 different bat species, 15 of which are endangered.
- > Natural insecticides as they eat insects.
- > Only one birth per year, which is why they are endangered.
- > Habitat close to wetlands.
- > For nesting boxes on facades, place them facing south or southeast.
- > Nocturnal animal that locates itself by echolocation.
